

WordPress Internship Assignment

Project Title

School Management Portal (Mini ERP)

Objective

Build a WordPress-based School Portal that allows students, teachers, and administrators to manage academic information.

Part 1: Custom Theme Development

Create a custom WordPress theme from scratch.

Requirements:

- Responsive Design
- Header & Footer
- Homepage
- About School Page
- Contact Page
- Blog Page

Must Include:

- Custom Navigation Menu
- Custom Logo Upload
- Widget Areas
- Theme Customizer Options

Part 2: Custom Post Types & Taxonomies

Create a Custom Post Type: Students

Fields:

- Student Name
- Roll Number
- Class
- Section
- Photo

Taxonomies:

- Class
- House

Requirements:

- Admin CRUD
- Archive Page
- Single Student Page

Part 3: Plugin Development

Create a custom plugin: School Notices Manager

Features:

- Add Notices
- Edit Notices
- Delete Notices

Fields:

- Title
- Description
- Expiry Date
- Attachment

Frontend Shortcode:

[school_notices]

Display active notices and hide expired notices.

Bonus: AJAX Search Notices

Part 4: REST API Integration

Integrate any public API such as Weather API, News API, or Dictionary API.

Requirements:

- Display API Data
- Loading State
- Error Handling

Bonus: Store API response using transient cache.

Part 5: Database & SQL

Create a custom table on plugin activation:

wp_student_attendance

Columns:

- id
- student_id
- date
- status
- created_at

Requirements:

- Insert Attendance
- Update Attendance
- Display Attendance Report

Part 6: Security & Optimization

Security:

- Nonces
- Data Sanitization
- Escaping
- Prepared SQL Queries

Performance:

- Object Cache / Transients

- Lazy Loading Images

Part 7: Bug Fixing Challenge

Fix the following code and explain all issues found:

```
global $wpdb;  
$id = $_GET['id'];  
$result = $wpdb->get_results('SELECT * FROM wp_students WHERE id = $id');  
echo $result[0]->name;
```

Deliverables

Submit:

- custom-theme.zip
- school-notices-plugin.zip
- database.sql
- README.md

README should include installation steps, features, screenshots, and assumptions.
